

Mappedin

Indoor Mapping & Wayfinding Platform for Airports

Mappedin transforms passenger experience through intelligent indoor mapping and navigation. Trusted by LAX, Schiphol, Calgary, and 35+ global airports, we deliver the only platform built specifically for modern airport operations—connecting passenger wayfinding, commercial revenue, and operational systems in one unified solution. From terminal-wide digital directories to real-time flight integration, we help airports guide passengers while driving commerce.

Where Passenger Experience Meets Revenue

"One platform that connects systems, partners, and passengers—turning navigation into opportunity."

Commercial Revenue Engine

Drive concessions, discovery, and spending through intelligent product search, targeted promotions, and strategic location visibility. Passengers find what they need while you maximize commercial performance.

Enterprise Accessibility

WCAG 2.2 and EAA compliant with 40+ languages, screen reader support, and accessible routing. Reduce assistance requests while meeting accessibility standards and ensuring every passenger navigates with confidence.

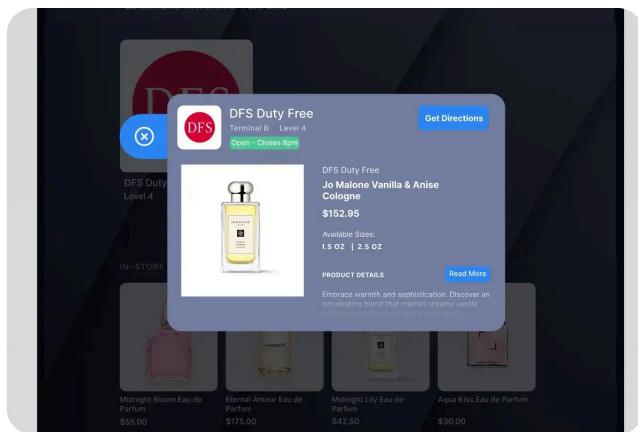

Real-time Integration Hub

Centralize flight status, security waittimes, parking, and shuttle schedules on a single map. Seamless API connections with existing airport systems keep operations synchronized and passengers informed.

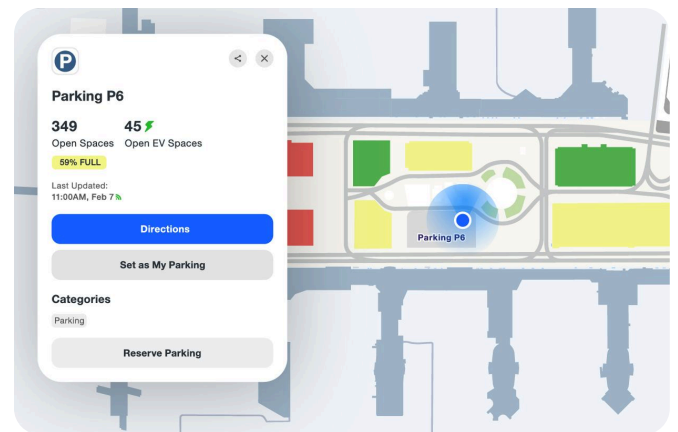

Multi-channel Deployment

Deploy across airport kiosks, mobile apps, airline partnerships, and web—all from one platform. Consistent passenger experience at every touchpoint with centralized content management.

Purpose-built for Airports

- Live flight data and gate information integrated directly into passenger navigation
- Daily GIS auto-sync keeps maps current across all touch points without manual updates
- Commercial directory with product search drives passengers to specific retail locations

Proven Airport Impact

- **MIA:** Omnichannel engagement across chat, web, mobile, and agentic AI experience
- **LAX:** Real-time shuttle, parking, and security data on unified passenger map
- **Calgary YYC:** Volunteers equipped with QR code route sharing
